Services Brochure 2026

BUILDING & CONSTRUCTION SERVICES

At BGS&D, we provide a range of building and construction services across residential and commercial projects throughout England.

Our services include carpentry and joinery, bricklaying, dry lining, plastering, tiling, painting and decoration, plumbing and electrical work, as well as suspended ceilings and full refurbishment projects.

We also carry out fire door surveys, installation and maintenance, ensuring buildings meet the required safety standards.

We work with developers, contractors, property managers and homeowners, delivering reliable workmanship, quality finishes and professional project delivery.

BGS&Ds SEAL OF APPROVAL

We work to recognised industry standards and maintain the certifications that matter. Each accreditation reflects our commitment to safety, compliance, and professional delivery. You can move forward knowing every stage is handled correctly.

Our team holds relevant qualifications and training across construction, health and safety, and specialist works. We follow best practice on site, keep documentation clear, and meet regulatory requirements without delay.

From initial planning through to completion, our accreditations support a structured and reliable process. The result is a project delivered to the correct standard, with full accountability and confidence at every step.

EXTENSIONS

FROM FOOTINGS TO ROOFING

We deliver complete extension projects from the ground up, managing every stage with precision and care. From initial groundworks and footings through to structural builds, roofing, and final finishes, our team ensures each element is completed to a high standard.

We coordinate all trades to keep your project moving efficiently, maintaining clear communication throughout. The result is a seamless extension that integrates with your existing property, built to perform, built to last.

OFFICE FIT-OUTS & REFRUBS

We deliver office fit-outs and refurbishments that create practical, well-finished working environments. From strip-out and reconfiguration through to partitioning, electrical, plumbing, and final finishes, every stage is managed in-house.

We work to your layout, branding, and operational needs, ensuring minimal disruption and efficient delivery. The result is a space that supports productivity, reflects your business, and is built to a high standard throughout.

END TO END NEW BUILD CONSTRUCTION

We take on new build projects with a structured, start to finish approach that focuses on control, compliance, and build quality at every stage. From site preparation and foundations through to superstructure, services, and final finishes, each phase is carefully planned and executed by experienced teams.

We work closely with clients, architects, and consultants to ensure designs are delivered accurately, with full visibility on progress, cost, and timelines. The result is a fully completed property, whether a home or outbuilding, delivered efficiently and ready for immediate use.

FOUNDWORKS BRICKWORK ROOFING ELECTRICAL PLUMB

24/7 REACTIVE MAINTENANCE

We provide responsive reactive maintenance services to address issues quickly and keep your property operational. From urgent repairs to ongoing faults across building, electrical, plumbing, and structural elements, our team acts fast to diagnose and resolve problems efficiently.

We prioritise clear communication, rapid attendance, and practical solutions that minimise disruption. The result is reliable support when you need it, helping you maintain safe, functional spaces at all times.

HAVE A PROBLEM? CALL 01375 667558

FIRE DOORS & FIRE STOPPING

We deliver fire door installation and fire stopping services that protect people, property, and ensure full compliance.

From installing and upgrading fire-rated doors to sealing service penetrations and compartmentation gaps, every detail is handled with precision. Our team works to current regulations and approved standards, carrying out thorough checks to maintain the integrity of fire protection systems.

The result is a compliant, well-protected environment with clear documentation and confidence in every installation.
